Experience

Software developer at Accountor, 6/2020 – present

Full-stack web development as a part of an agile development team. Establishing code standards and quality tools to the workflow and redesigning large part of the user interface for the TyövuoroVelho® mobile application.

Web developer at the city of Jyväskylä library services, 6/2018 – 6/2021

Building a front end for the national library database to visualize libraries schedules and other details. Creating a content management system for producing news and events and implementing a public API for displaying them at the homepage of Keski Libraries. Operating at a key role in the production and design of the new online library.

Web developer at the Karelia University of Applied Sciences, 6/2017 – 8/2021

Designing and producing multiple web applications with a variety of features.

- Application form and management system for the Draft Program® -innovation competition. The organizers can e.g. create new competition events, filter applications and respond to them.
- Appointment calendars for the Student Welfare Officer and International Exchange coordinators of Karelia University of Applied Sciences.
- Room reservation system for the library of Karelia University of Applied Sciences.
- National portal for bioeconomy related studies available in Finnish universities and universities of applied sciences.

Open Source contributor at OpenLP, 11/2014 – 12/2017

OpenLP is a cross-platform presentation application for displaying, text, images and other types of media. Improving the user experience by making it easier to manage and present content while increasing the stability of the program.
